

~~CONFIDENTIAL~~

Acting Chief, Finance Division

13 November 1952

Deputy Comptroller

Medical Survey of the Far East

1. Pursuant to my recent discussion with you, the following is quoted from a medical survey of the Far East covering the period 1 July 1952 to 21 August 1952:

"Few individuals had any explanation of the fluctuating deposits made to their accounts by Headquarters. [REDACTED] medical personnel stated they had never received their twenty-five per cent differential, having been informed that this would not be forthcoming until their tours were completed. The general effect has weakened the confidence of field employees in the Agency."

25X1A6a

2. Also, in another portion of the report pertaining entirely to the situation [REDACTED] the following is quoted:

25X1A6a

"an investigation of paying allowances be made to confirm and correct complaints that employees have not been fully paid for as long as six months. (All medical personnel stated they had never received their twenty-five per cent differential.)"

3. It will be appreciated if you will report your findings and recommendations concerning the above quotes as soon as practicable.
